DOBSON, NORTH CAROLINA

RATE SCHEDULE C
Residential All-Electric Service

APPLICABILITY

This schedule is applicable only to individually metered residential members and residences, condominiums, mobile homes, or apartments where all energy required for water heating, cooking, clothes drying, and environmental space conditioning is supplied electrically.

TYPE OF SERVICE

The Cooperative will furnish 60-Hertz service to one meter at one delivery point at one of the following approximate voltages where available: single-phase 120/240 volts; or other available voltages at the Cooperative's option

ELECTRIC SPACE CONDITIONING AND WATER HEATING REQUIREMENTS

Electric heating and electric water heating shall meet the following conditions:

Electric Space Heating

Electric space heating shall be supplied by a heat pump. The heat pump shall be controlled by two stage heating thermostats, the first stage controlling compressor operations and the second stage controlling all auxiliary resistance heaters. Auxiliary heaters shall be limited to 48 amps. (11.5 kW at 240 volts) each and shall be switched so that the energizing of each successive heater is controlled by a separate adjustable outdoor thermostat. A manual switch for bypass of the first stage and the interlock of the second stage of the heating thermostat is permitted.

Electric Domestic Water Heating

1. Water heaters shall be of the automatic insulated storage type of not less than 30-gallon capacity and may be equipped with only a lower element or with a lower element and an upper element.
2. Water heaters having only a lower element may have wattages up to but not exceeding the specific wattages as shown below for various tank capacities:

<u>Tank Capacity in Gallons</u>	<u>Maximum Single Element Wattage</u>
30 to 39	3,500
40 to 49	4,500
50 and larger	5,500

3. Water heaters having both a lower and upper element may have wattages in each element up to but not exceeding the specific wattages set forth in the table above for single element heaters, but they must have interlocking thermostats to prevent simultaneous operation of the
